Affinity Suite
Adobe CC
Figma

LANGUAGES

German (Mother language)
English (C1)
Russian (Speaking)

CERTIFICATES

PROJECT MANAGEMENT
Prof. Product Owner I
Prof. Scrum Master I

ABOUT ME

I am Denis, 24 years old and currently a frontend developer by profession. Since the startup Elara, where I was working, laid off half of the staff, I am now looking for a new challenge. I am reliable, a team player and very adaptable.

WORK EXPERIENCE

Frontend Engineer

Elara Digital GmbH / 06.2022 - 10.2022

At Elara, I worked on the React-based application and also translated it completely from German to English using i18n. To do this, I gave the company website a major overhaul using React and NextJS. Here I also worked in an English working environment for the first time.

Frontend Developer

Main Method GmbH / 01.2022 - 05.2022

Here, I first acquired the Scrum certificates mentioned on the left during the non-project time, and after some interviews with e.g. ProSieben or VW, I finally decided to join a project of Daimler. Here I worked on an imprint generator in the app publishing pipeline.

Junior Frontend Developer

onvista media GmbH / 08.2019 - 12.2021

Here I learned the principles of Scrum and general frontend work. I mainly designed and developed features together with the internal UI/UX designer. The lively exchange helped me to understand and make sense of many aspects in web design like accessibility, color matching or our general psychology of perception.

Training as an IT specialist for application development

denkfabrik groupcom GmbH / 08.2016 - 08.2019

It was during my apprenticeship that I first came into contact with many aspects of the digital world. Here I learned how to program, build websites and use Adobe CC.

Part-time self-employment

Denis Gusarov / 08.2016 - Heute

I already started to earn some money on the side, with design and web development, during my apprenticeship. I'm still learning to this day, but many things are now second nature to me, such as accounting, customer contact and coordinating helpers needed for some projects.
